**Q1** Respondent skipped this question

Which Municipal District do you live in?

---

**Q2** Yes

Are you concerned about Climate collapse?

---

**Q3** Yes

In your opinion, has human behaviour brought about negative changes in our climate and natural environment?

---

**Q4** Far too little

In your opinion, is the Irish government doing enough to address climate change?

---

**Q5** Yes

Do you agree that the natural environment is one of Sligo's biggest assets?

---

**Q6** Respondent skipped this question

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

---

**Q7** Yes

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

---

**Q8**

**Yes**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

If Yes, please detail

local flooding, weather extremes

---

**Q10**

**Respondent skipped this question**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

---

**Q11**

**Respondent skipped this question**

Where do you think responsibility for taking positive climate action lies?

---

**Q12**

**Extremely willing**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

Other (please specify):  
but glass containers as opposed to plastic

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

**Respondent skipped this question**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

**Q13**

Other (please specify):  
All the above

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

It's simple- we have to change and my family feels better for it. More collected to the world around us.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

We have superb areas in Sligo designated for Nature (SACs, SPAs, NHAs and pNHAs). They sequester carbon, attenuate water and maintain biodiversity- protect these as a core principle at government level.

**Q6** **Yes**

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

---

**Q7** **Yes**

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

---

**Q8**

**Yes**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

If Yes, please detail

Storms

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	<b>2</b>
Reversing the decline in native species	<b>1</b>
Investing in proactive climate action	<b>9</b>
Tackling littering and Illegal dumping	<b>4</b>
Reducing levels of domestic waste, including plastic packaging	<b>5</b>
Encouraging fewer car journeys and increased public transport use	<b>10</b>
Planning for better, more sustainable housing and communities	<b>6</b>
Providing more green spaces, parks and on-street plantings	<b>8</b>
Protecting our natural environment and limited natural resources	<b>7</b>
Planting more trees and leaving areas wild for wildlife	<b>3</b>

---

**Q11**

Where do you think responsibility for taking positive climate action lies?

**There is equal responsibility on individuals and government to work together to bring about positive change**

---

**Q12**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Very willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

**Purchasing products without plastic packaging**

---

**Q14**

**Respondent skipped this question**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

---

**Q15**

**Respondent skipped this question**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

---

**Q12**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Very willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

**Less car Journeys**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

No real alternatives in Sligo to car. Inadequate bus routes, inaccessible train station in town, pay to park at other stations - no incentive to get train. Expense of train

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

We are selling Sligo as an amazing and beautiful place to live and work but are not investing in the very thing that we want people to come here for. Our promo videos would not look so good if they showed a plastic littered river or beach

---

**Purchasing products without plastic packaging**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Soft plastics are a big problem there is so much of it and can't recycle it and people are still putting it in to the recycling bins. I put lots of effort into not see people put the recycling into plastic bags and putting into recycling bins is very annoying.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

More info and advertising needs to go into telling people how to recycle.

**Home Composting**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

I've made a number of these changes, a few of them at the behest of the children. Would like to see more leadership from Sligo co co, their attitude to biodiversity is depressing, it's hard to persuade individuals to change when the council flaunt best practice routinely

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Management of public spaces. Increased public transport.

---

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Its hard. Most products come in a plastic cover. And financially its difficult to get non plastic versions. The companies selling these products need pressure to change these things.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

We need recycling bins in town as well as general refuse bins. Even if it was glass bins and plastic bottle bins, so that the correct waste was put into them. More signs around the place to remind people of what actually is recycable. Maybe more pressure from Sligo to bigger companies to stop producing non recyclable products and therefore less rubbish. Have a terracycle drop off point for items that can be recycled though them. More sustainable fairs..reinforcing the words reduce, reuse, etc to be done before we even recycle. Promoting companies, local or not local, to others about their sustainable products.

Providing more green spaces, parks and on-street plantings	<b>9</b>
Protecting our natural environment and limited natural resources	<b>4</b>
Planting more trees and leaving areas wild for wildlife	<b>6</b>

---

**Q11**

**We can only address climate destruction with government action**

Where do you think responsibility for taking positive climate action lies?

---

**Q12**

**Extremely willing**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

**Home Composting**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Very few options available for reducing packaging and recycling different materials new innovative biodegradable products and packaging need to become common place in supermarkets and local shops. Difficulty lies in changing attitudes especially of older generations and teaching people to make these changes through the daily things they do to reduce waste etc.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Implement and enforce Smokey coal ban.

Implement and enforce ban on use of weed killers, except for use on invasive species when required by local authorities

Hedge cutting and land reclamation to be strictly regulated.

---

**Q1** **Sligo - Drumcliffe MD**

Which Municipal District do you live in?

**Q2** **Yes**

Are you concerned about Climate collapse?

**Q3** **Yes**

In your opinion, has human behaviour brought about negative changes in our climate and natural environment?

**Q4** **No**

In your opinion, is the Irish government doing enough to address climate change?

**Q5** **Yes**

Do you agree that the natural environment is one of Sligo's biggest assets?

**Q6** **Yes**

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

**Q7** **Yes**

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

**Q8**

No

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

Respondent skipped this question

If Yes, please detail

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	5
Reversing the decline in native species	3
Investing in proactive climate action	4
Tackling littering and Illegal dumping	1
Reducing levels of domestic waste, including plastic packaging	2
Encouraging fewer car journeys and increased public transport use	9
Planning for better, more sustainable housing and communities	7
Providing more green spaces, parks and on-street plantings	8
Protecting our natural environment and limited natural resources	10
Planting more trees and leaving areas wild for wildlife	6

---

**Q11**

There is equal responsibility on individuals and government to work together to bring about positive change

Where do you think responsibility for taking positive climate action lies?

---

**Q12**

Extremely willing

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

Other (please specify):  
At least 6 of the above!

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Some easier than others! Plastic reduction proving hard

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

More free events in our environment that are open to the public and advertised so that it isn't just a small group of like minded people getting together. Emphasis on young people but also their parents as well as the general public.

Providing free learning in their own town, getting out and experiencing nature and realising how great it is, the damage that has been done and discovering ways to change in a positive way will encourage big changes at individual level.

People need to get back in touch with nature, especially in a town where people forget it even exists sometimes.

Unpredictable seasons and aggressive weather

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

- |   |           |
|---|-----------|
| Protecting our water quality                                      | <b>1</b>  |
| Reversing the decline in native species                           | <b>2</b>  |
| Investing in proactive climate action                             | <b>3</b>  |
| Tackling littering and Illegal dumping                            | <b>4</b>  |
| Reducing levels of domestic waste, including plastic packaging    | <b>5</b>  |
| Encouraging fewer car journeys and increased public transport use | <b>6</b>  |
| Planning for better, more sustainable housing and communities     | <b>7</b>  |
| Providing more green spaces, parks and on-street plantings        | <b>8</b>  |
| Protecting our natural environment and limited natural resources  | <b>9</b>  |
| Planting more trees and leaving areas wild for wildlife           | <b>10</b> |
- 

**Q11**

**We can only address climate destruction with government action**

Where do you think responsibility for taking positive climate action lies?

---

**Q12**

**Extremely willing**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

Other (please specify):  
All of above

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Public transport is not meeting my basic needs

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Sligo is a small town and had the ability to lead the way in environmental protection as it should be our most valued asset

---

**Q1** **Sligo - Strandhill MD**

Which Municipal District do you live in?

---

**Q2** **Yes**

Are you concerned about Climate collapse?

---

**Q3** **Yes**

In your opinion, has human behaviour brought about negative changes in our climate and natural environment?

---

**Q4** **No**

In your opinion, is the Irish government doing enough to address climate change?

---

**Q5** **Yes**

Do you agree that the natural environment is one of Sligo's biggest assets?

---

**Q6** **Yes**

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

---

**Q7** **Yes**

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

---

**Q8**

**Yes**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

If Yes, please detail

I've noticed there aren't half as many frogs near the local streams as there would have been years, especially around mating season.

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	<b>1</b>
Reversing the decline in native species	<b>2</b>
Investing in proactive climate action	<b>9</b>
Tackling littering and Illegal dumping	<b>3</b>
Reducing levels of domestic waste, including plastic packaging	<b>10</b>
Encouraging fewer car journeys and increased public transport use	<b>8</b>
Planning for better, more sustainable housing and communities	<b>4</b>
Providing more green spaces, parks and on-street plantings	<b>7</b>
Protecting our natural environment and limited natural resources	<b>6</b>
Planting more trees and leaving areas wild for wildlife	<b>5</b>

---

**Q11**

Where do you think responsibility for taking positive climate action lies?

**There is equal responsibility on individuals and government to work together to bring about positive change**

---

**Q12**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Very willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

**Take more public transport**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

The local bus routes are extremely unreliable which makes it difficult to plan your day.

---

---

**Other**

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Very difficult to purchase goods with less plastic. Need reusable food bags to be available and acceptable in shops e.g for buying fruit &veg.

A carbon tax will not make people change to electric cars as the initial cost of the car is too much for the ordinary worker.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Education is so important not just in schools but adults. If people understand why they need to change their ways, then they are more likely to come on board. People also must be given the know-how.

Other (please specify):  
Most of above +I don't eat meat, segregate waste, let parts garden grow wild

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

An utter disgrace that water charges were reversed -people not willing to do the right thing. Immediately install more EV charging points. Supermarkets provide container at checkout for superfluous packaging, esp. plastics. Systematically clean gulleys/vacuum footpaths within urban area. Ban chewing gum.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Chewing gum is a curse and should not be tolerated. Derelict/ neglected houses/businesses tolerated for too long - expedite a response that gets results within 3 months of notification & ramp up deterrent.

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

This should have been a multiple choice question. Eating less meat is easy, extra money to then spend on higher quality meat. Public transport is ok. Plastic packaging is a problem, too much. Also companies do not label packaging well enough to indicate whether it's recyclable or not. Bad CSR or regulation. Increasing biodiversity in garden is doable but takes a lot of time. Not possible for a lot of people. Education is very important. Organic center in rossinver doing great work, their subjects should be made part of a Sligo IT curriculum on sustainability and resilience... things like permaculture need to become part of mainstream learning

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Coastal erosion of course. But Sligo is lucky in its natural resources and potential for harnessing renewables. People need to become more autonomous. Small-scale water and wind turbines combined with solar and greenhouses for increased heat and food production must be encouraged and made increasingly accessible

---

**Very willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

Other (please specify):  
I practice all of the above. And by most household items and clothing from charity shops. Don't use make up or hair products or pharmaceuticals.

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

More trains please to more locations from Sligo than the Dublin route

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

I practice all of the above, but I straddle two continents because of family and flying so I feel like I can never do enough to reduce my carbon foot print. I also think that no matter how much I avoid plastic, the American military industrial complex as well as the UK, Russia and China relies on all these petroleum products and R&D of which plastic packaging, iPhones, and pharmaceuticals, etc...are a somewhat "less-profitable" by-product of Military Defence programs". I don't eat meat. I grow organic veg. Create bio diversity on my land, Compost, try not to take more than I truly need and I don't take pharmaceuticals (very bad for the water supply as many do not break down). Private enterprise is far more responsible for the problems that have created this crisis and I'm not convinced that government can really enforce the restraints it might enact. A "fine" or higher taxes means the business will lay off employees and will relocate to a more advantageous tax option. Divesting and not consuming might make a difference. But that is back to the individual. I can't unknow what I know and have to live with my conscience and inconsistencies and behave as responsibly as I can, but I am privileged enough to be able to do this as well. I am not a citizen of Ireland, so I do not have a say in her government. So it is even more important for me to be respectful of her lands and people by caringvfor the land in which I dwell. But I support any program that reduces harm to the planet! No more roads, please! More trains!

**Q1** **Ballymote - Tubbercurry MD**

Which Municipal District do you live in?

---

**Q2** **Yes**

Are you concerned about Climate collapse?

---

**Q3** **Yes**

In your opinion, has human behaviour brought about negative changes in our climate and natural environment?

---

**Q4** **No**

In your opinion, is the Irish government doing enough to address climate change?

---

**Q5** **Yes**

Do you agree that the natural environment is one of Sligo's biggest assets?

---

**Q6** **No**

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

---

**Q7** **Yes**

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

---

**Q8**

**Yes**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

If Yes, please detail

Decline of insects, birds,

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	<b>1</b>
Reversing the decline in native species	<b>6</b>
Investing in proactive climate action	<b>5</b>
Tackling littering and Illegal dumping	<b>7</b>
Reducing levels of domestic waste, including plastic packaging	<b>2</b>
Encouraging fewer car journeys and increased public transport use	<b>10</b>
Planning for better, more sustainable housing and communities	<b>3</b>
Providing more green spaces, parks and on-street plantings	<b>8</b>
Protecting our natural environment and limited natural resources	<b>4</b>
Planting more trees and leaving areas wild for wildlife	<b>9</b>

---

**Q11**

Where do you think responsibility for taking positive climate action lies?

**There is equal responsibility on individuals and government to work together to bring about positive change**

---

**Q12**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Extremely willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

Other (please specify):  
Be diligent about all above

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Small changes, more talks education,

---

**Q15**

**Respondent skipped this question**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

**Purchasing products without plastic packaging**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Government to introduce packaging license system to make importers prove their packaging can be recycled.

" currently not recycled - single use plastic film" should be banned with immediate effect. Council to audit local waste disposal companies to check of waste is being recycled or going to landfill.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

The spreading of used sheep dip on land and it's potential to damage ground water.

This practice should be banned, and sheep farmers asked to dispose of chemicals through an external body which audits disposal of same.

**Very willing**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

Other (please specify):  
All of the above

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Provide grants/low interest loans to facilitate home energy efficiency upgrades and the purchase of new EVs

Improve the quality of public transport

Have a visibly CC pro-active planning system (LAs, ABP) which incorporates CC values and costs into all decision making (housing, transport, water supply and waste disposal)

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

1) The assessment of CC costs/benefits and actual environmental impacts of the Wild Atlantic Way (an almost entirely car accessed route, with potential environmental impacts that have not yet been successfully mitigated)

2) The assessment of CC costs/benefits of agriculture (we are a predominantly rural county) and associated potential for improvements in biodiversity (RBAPs programme?)

2) The assessment of CC costs/benefits and actual environmental impacts of the Wild Atlantic Way (an almost entirely car accessed route, with potential environmental impacts that have not yet been successfully mitigated)

**Q8**

**Yes**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

If Yes, please detail

Significant coastal erosion of dunes systems

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	<b>7</b>
Reversing the decline in native species	<b>5</b>
Investing in proactive climate action	<b>6</b>
Tackling littering and Illegal dumping	<b>9</b>
Reducing levels of domestic waste, including plastic packaging	<b>8</b>
Encouraging fewer car journeys and increased public transport use	<b>4</b>
Planning for better, more sustainable housing and communities	<b>10</b>
Providing more green spaces, parks and on-street plantings	<b>3</b>
Protecting our natural environment and limited natural resources	<b>1</b>
Planting more trees and leaving areas wild for wildlife	<b>2</b>

---

**Q11**

Where do you think responsibility for taking positive climate action lies?

**There is equal responsibility on individuals and government to work together to bring about positive change**

---

**Q12**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Very willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

**Less car Journeys**

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Employer's need to take a pro-active approach to the need to employees to attend work every day. Flexible start/finish times help reduce peak traffic and make more efficient use of the existing transport system. One day working from home per week (using laptop and VPN/internet) could reduce weekly commuting by 20%. A 4-day week with longer daily hours would also have the same effect. Why insist people drive to work to sit at a desk to do the same thing they could do from their kitchen table or study?

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Suggest establishing wildlife migration corridors from peak to shore line, ensuring uninterrupted pathways for fauna.

Stop encroaching on the public spaces/amenity that we have and make better use or provide tax incentives for development of brownfield sites or derelict properties.

**Q1** **Sligo - Strandhill MD**

Which Municipal District do you live in?

**Q2** **Yes**

Are you concerned about Climate collapse?

**Q3** **Yes**

In your opinion, has human behaviour brought about negative changes in our climate and natural environment?

**Q4** **No**

In your opinion, is the Irish government doing enough to address climate change?

**Q5** **Yes**

Do you agree that the natural environment is one of Sligo's biggest assets?

**Q6** **Yes**

Do you think a failure to give equal weighting to the natural environment as we currently do economic development is likely to have negative impacts on our long term prosperity and our attractiveness to new business?

**Q7** **No**

Do you think that equal attention and funding should be given to addressing harmful climate change and protecting our natural environment as to promoting economic development and prosperity?

**Q8**

**No**

Have you noticed any changes in your local natural environment that you think might be happening as a result of climate change?

---

**Q9**

**Respondent skipped this question**

If Yes, please detail

---

**Q10**

What do you think are the most important environmental issues facing Sligo? Please rank in order of most important to least

Protecting our water quality	<b>6</b>
Reversing the decline in native species	<b>1</b>

---

**Q11**

**We can only address climate destruction with government action**

Where do you think responsibility for taking positive climate action lies?

---

**Q12**

**Very willing**

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

---

**Q13**

**Eating less meat**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

Works fine. Just change my recipes. Maybe ask local restaurants to put on more good quality veggie dishes.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

Implementation of electric car charging points in all car parks. If there are lots of them they don't need to be fast chargers, lots of slow chargers are far cheaper. This is the model that is employed in Norway. Street lamps have chargers built into them as the electric cabling is already there.

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

This is very difficult as in most supermarkets all fruit and vegetables come in plastic packaging. The opening of a low waste shop where it is possible to bring containers to use instead of plastic would be greatly beneficial.

How willing are you to change your lifestyle to reduce the damage you cause to the environment?

**Extremely willing**

---

**Q13**

Have you tried any of the following actions recently to try and reduce your negative impact on the local environment?

Other (please specify):  
Literally all of the above.

---

**Q14**

If yes, how has this worked for you? Have you faced any problems trying to make these changes? What are your suggestions for making it easier for people to make proactive change?

We are very happy with the results and would encourage others to do the same, and more. We have not found it difficult in the slightest to make these changes, when compared against the struggles the human race will encounter in the very near future.

---

**Q15**

If we have missed anything that you think will be a crucial environmental issue for Sligo over the next decade, please let us know

The climate crisis is going to have unimaginable consequences on global agriculture and will result in severe food shortages and mass starvation the world over. As much as is possible, more food will need to be grown locally, and with as little environmental impact as possible.
